ABOUT ME

I am a Frontend Developer with strong problem-solving skills, a passion for learning, and expertise in programming and user interface design. As an Engineering graduate, I am eager to apply my knowledge in software development and testing. I am seeking a challenging role where I can contribute to the success of an innovative organization by building engaging and efficient web applications.

EXPERIENCE

Frontend Developer

Feb 2024 – Present

Zestl Software Solutions Private Limited, Pune, Maharashtra

- ✓ Contributed to the development of Zestl Software's official website.
- ✓ Developed features for generating dynamic PDFs using frontend technologies.
- ✓ Worked on the company's flagship product, Zvolv, a platform for workflow automation and collaboration.
- ✓ Collaborated with various clients across India to understand their requirements and deliver solutions.
- ✓ Involved in testing and ensuring the quality of the product across different stages.

Junior Software Developer

March 2023 – Jan 2024

Maxgen Technologies Pvt.Ltd, Pune, Maharashtra

- ✓ Develop interactive websites and e-commerce platforms with secure payment systems.
- ✓ Migrate legacy systems to the cloud and implement CI/CD pipelines.
- ✓ Custom enterprise software development to automate business processes.
- ✓ SEO-optimized websites enhancing sales and user experience.

- ✓ **Backend Technology** - JDBC, Servlets, JSP, Hibernate, Spring, Spring Boot.
- ✓ **Database Technology** - MySQL, MongoDB
- ✓ **Database Technology** - Eclipse, VS code, Apache Tomcat, Apache NetBeans, STS, Postman

PROJECTS

Zvolv Website Development (Using:- Angular)

- ✓ As a Frontend Developer at Zvolv, I played a key role in creating web pages using Angular for the company website. My responsibilities included implementing designs, ensuring responsiveness, and collaborating with the team to deliver an engaging user experience.

Dynamic Email Sender (Using: Java Spring Boot)

- ✓ Developed a Java-based email sender service as part of a Spring Framework project. Implemented dynamic configuration for sender, recipient, subject, and body fields, enabling flexible email content. The project underscored proficiency in Java programming, the Spring Framework, debugging, and realworld application development.

Bookings Of Drone Shots Web Application (Using:- React.JS)

- ✓ The project aimed to develop a web application that facilitates operators in managing customers and their bookings for drone shots. The application stores this information in the backend tables. The key goal was to allow operators to create, modify, and delete customer bookings, as well as easily create and update customer details.

ROLES & RESPONSIBILITIES

- ✓ An enthusiastic Software Developer with highly motivated and leadership skills
- ✓ Solving complex problems using data- driven approaches and analytical skills.
- ✓ Collecting, cleaning, and analyzing data to identify trends and patterns
- ✓ Played a key role in creating web pages using Angular for the company website.
- ✓ Implementing designs, ensuring responsiveness, and collaborating with the team to deliver an engaging user experience.
