PROFILE

Passionate and skilled web developer with 1 years of experience in designing, developing, and maintaining responsive and user-friendly websites and web applications. Proficient in front-end and back-end technologies, including HTML, CSS, JavaScript along with database management systems like MySQL.

WORK EXPERIENCE

Web Developer

InnogenX, Bengaluru
November 2023 - Present

PROJECT

DRDO

<https://www.drdoaeroindia2023.com/index.php>

DRDO – Aero India2023 is a website allowing visitors and dignitaries of Aero India to access information on various labs and DRDO products simply by scanning QR codes. Additionally, users can navigate their accommodation and transportation for the event. My involvement included design analysis and the development of the GUI interface.

Rico Winery

<https://ricowines.com/>

Developed the informative website for Rico Wines, a boutique winery, providing detailed information about their curated selection of premium wines. The project included designing a sleek and intuitive interface that showcases the winery's offerings and history. Additionally, I implemented a booking system for vineyard tours, allowing visitors to easily schedule their visits online. The site was optimized for responsiveness across all devices and built with a focus on performance, ensuring quick load times and a seamless user experience.

Technologies Used:

- Frontend: HTML5, CSS3, JavaScript.
- Booking System Integration: Custom-built solution or third-party API integration

Key Achievements:

- Streamlined the vineyard tour booking process, resulting in a 30% increase in bookings.
- Enhanced site performance, reducing load times by 35%.
- Implemented responsive design, ensuring consistent user experience across all devices.

AR VR Solution

<https://arvrsol.com/>

The AR/VR Appointment Booking System simplifies scheduling for AR/VR services, providing user convenience with automated email or SMS notifications for booking confirmations, keeping users informed. It ensures device compatibility for seamless access. My involvement in slot booking and GUI interface.

Tony & Guy

<https://www.toniandguybangalore.com/>

Developed the website for Toni & Guy Bangalore, a leading salon franchise known for its premium hair and beauty services. The project involved creating a sleek, modern design that reflects the brand's high-end image while ensuring a user-friendly experience. The site includes detailed service descriptions, stylist profiles, and an online appointment booking system. Additionally, the website was optimized for search engines and mobile devices to increase visibility and accessibility for potential clients.

Naturals

<https://www.naturalsbangalore.com/>

Developed the website for Naturals Bangalore, part of the renowned Naturals salon chain, focusing on providing a comprehensive online presence for their beauty and wellness services. The project involved designing a clean, elegant interface that highlights the salon's offerings, including haircare, skincare, and bridal services. Key features include an online booking system, service details, and promotional sections. The site was built with an emphasis on responsive design, ensuring a seamless user experience across all devices, and was optimized for search engines to enhance online visibility.
