

# Akshay Sanjeev Dhakare

Software Engineer

## PROFILE SUMMARY

Lobbytrack is the industry leading visitor management system for signing in and registering visitors with option for on- premise. It is a web-based solution designed to optimize visitor management processes in residential apartment complexes. It offers features like pre-registration, QR code-based check-in, real-time monitoring, access control integration and visitor history tracking. Employees can pre-register their visitors online before they arrive via Lobbytrack web-based online system, Lobbytrack Lobby App, or Lobbytrack Employee App. When the visitor arrives on-site, they can quickly sign in using the Lobbytrack Lobby App. If a visitor has not been registered in advance, you may register them when they arrive. Lobby track visitor registration software can auto-populate visitor record if a visitor has visited the facility in the past

## EDUCATION

- 2021 B.Tech/B.E.  
**Pune University**
- 2016 XIIth  
**English**
- 2007 Xth  
**Marathi**

## WORK EXPERIENCE

- Aug 2022 - Present Software Engineer  
**Insource Software Technology Pvt. Ltd.**  
#Responsible for gathering requirements and developing UI pages using Angular 14, Type Script, HTML5, CSS3, JavaScript, RxJS, ES6, AJAX and JSON #Designing and development of US available on JIRA as per requirement independently #Consuming the API as per business logic
