Projects

HexaHome

- Hexahome is a real estate project, one can buy, sell, rent and invest in properties like Individual house, villa, shops, plots, lands, PG, and coliving.
- There are properties for residential and commercial use.
- There will be top agents and builders for dealing with the properties.
- I worked as a frontend developer, and delivered pixel perfect design with functionality using the powerful framework like Next js and used tailwind for styling.
- Collaborated with designer for the beautiful design and backend developers for functionality and Integrated API for client and server page in this project.
- Also, I took care of SEO, which leads to ranking of the page on google.
- Our project is live at <https://hexahome.in>.
- We also have android and ios app live on playstore and appstore.

Hexadecimal Software Pvt. Ltd. Website

- I worked as a Frontend Developer and developed a pixel perfect design for company website.
- I collaborated with designer and the tech stack used in this website are Next Js and Tailwind CSS.
- Visit <https://hexadecimalsoftware.com>

GoByHomes

- It is all about Homes, in which we can buy or rent a house.
- It provides the feature of viewing the house thoroughly like area, price, facility, services etc.
- It provides a feature of google calendar synchronization. Where the admin can set the meeting with the client who is willing to buy or rent the house, client will get notified once the meeting is organized.
- I worked as a Frontend Developer in this project.
- I integrated the calendar synchronization task and I used Chakra UI for design

Carboonzero

- Carboonzero is based on estimation of the carbon emission from the industries.
- It shows the data in charts.
- I worked as a Frontend Developer, For creating the UI, I used MUI and Integrated Restful API using axios and used state management tool Redux

Haqdarshak

- It is a survey based application which collects the data of rural and urban areas.
- I worked as a Frontend Developer, Created UI using Material UI and Integrated Restful API using axios with state management tool (redux)
