

Vasanth M

Technical Staff Software
Developer

PROFILE SUMMARY

- I am a dedicated Full Stack Developer with over two years of experience in building scalable, high-performance web applications.
- Throughout my career, I have contributed to the development of AI-based products and no-code platforms, using technologies like React, Next.js, Angular, TypeScript, and Tailwind CSS. I have successfully led projects that focus on enhancing user experience, performance optimization, and responsive design.
- My key achievements include developing complex workflows with Redux and server-side rendering for fast, SEO-friendly web applications.
- Moving forward, my career goal is to leverage my technical expertise and leadership skills to contribute to innovative projects, further deepening my knowledge in AI-driven solutions and full-stack development.

WORK EXPERIENCE

Nov 2023 -
Present

Technical Staff Software Developer

EliteAppMakers AI Solutions

- As a Full Stack Developer at EliteAppMakers, I work on building AI-based products and no-code platforms using technologies like React, Next.js, TypeScript, Tailwind CSS, and MongoDB.
- My daily tasks involve creating performance-optimized, responsive web applications, implementing server-side rendering, managing state with Redux, and collaborating with cross-functional teams to enhance user experience.
- I also contribute to project management, ensuring timely delivery of scalable solutions, and continuously refining features based on user feedback.

Aug 2022 - Nov
2023

Software Engineer

Pratian Technologies

- Contributed to developing and delivering innovative software solutions, collaborating with cross-functional teams to meet project objectives.
- Gained hands-on experience in designing and implementing scalable, user-focused web applications using modern frontend technologies.

Solodoer

- Solodoer is a no-code platform designed to empower users to create and deploy applications without the need to write code.
- The platform simplifies the development process, making it accessible to non-developers while offering robust functionality for advanced users.
- Built using Next.js, Tailwind CSS, and TypeScript, Solodoer leverages the power of server-side rendering to ensure fast load times and improved SEO.
- The application also integrates Redux for efficient state management, allowing users to handle complex workflows with ease.
- Current Status: The Solodoer project is actively in development, with a focus on refining features and enhancing the overall user experience. The development team is continuously integrating feedback from early adopters and improving platform functionality. As part of the ongoing efforts, the team is utilizing tools like Next.js and TypeScript to ensure scalability, while Tailwind CSS provides responsive, modern UI design.
