WORK EXPERIENCE

SOFTWARE ENGINEER - FRONT END DEVELOPER Cavisson Systems | July 2022 - Present

- Expertise as a front-end developer at 'Cavisson Systems' by creating visually appealing and responsive user interfaces.
- Excelled in ReactJs for 2+ years, focusing on React fundamentals, component development, state management, and API integration.
- Collaborated with product managers and UX/UI designers to implement a responsive and user-friendly interface, increasing usability and satisfaction.
- Collaborate with team in revamping the user interface of products, resulting in a 20% increase in user engagement.
- Led end-to-end feature development, ensuring seamless integration with existing features for a smooth user experience.
- Developed new features and enhancements for the product using React.
- Learned Performance Testing, Chaos Engineering, Real Browser User to develop the comprehensive and effective front end UI.
- Boosted application speed by 30% by optimizing React component rendering and reducing unnecessary re renders through memoization techniques.
- Effectively addressed and implemented client requirements on a priority basis, ensuring timely delivery of high-quality Product.

PROJECTS

Chaos Engineering UI Design

- Led the UI design of a Chaos Engineering platform, enhancing the user experience with a modern, intuitive interface using React.

License Management

- Developed a comprehensive License Manager feature, manage user licenses, subscriptions, and entitlements across all the products.
- Enhanced security and UX by integrating role-based access controls and efficient license tracking features.

Time Filter

- Using ReactJs, enhanced a dynamic time filter component using React with state management to allow users to select specific time ranges, improving user experience.
- Implemented interactive time-picker inputs with real-time state management to enhance user experience in web applications.

Todo List

- A minimal structure with input fields, buttons, and a list to display the tasks.
- Adding, removing, and marking tasks as completed using basic DOM manipulation.

Quiz App

- Developed a responsive quiz app using React and Quiz API to load questions sequentially, allowing users to select answers and view real-time scores.
- Integrated a 'Next' button to fetch new questions and a final 'Submit' button for displaying the total score. Styled with Tailwind CSS to enhance user experience across devices.

E-Commerce Plateform

- Developed a full-stack eCommerce platform with React, Node.js/Express, and MongoDB, implementing JWT-based authentication for secure user login and management.
- Integrated Stripe API for secure payment processing, enabling seamless transactions.
- Built features like product browsing, shopping cart, and order history, ensuring responsive design and smooth user experience.
