ACADEMIC PROJECT AND INTERNSHIP TRAINING:

Project Name: BLOOD BANK & DONOR MANAGEMENT SYSTEM.

Tools Used :- PHP AND MYSQL DATABASE.

Description :- The project consists of a central repository containing various blood deposits available along with associated details. These details include blood type, storage area and date of storage. These details help in maintaining and monitoring the blood deposits. These details include blood type, storage area and date of storage. At the present there is no software to keep any records in blood bank. Easy operations for operator of the System. Attendance is take manually. The "Blood Bank Management System" has been developed to override the problems prevailing in the practicing manual system. This software is supported to eliminate and, in some cases, reduce the hardships faced by this existing system. Throughout this study we aim to find a solution that will assist blood centres as well as patients and willing blood donors alike
