PROFESSIONAL EXPERIENCE

Abbigale Cloud Services   **Aug 2023 - Present**

Web Developer
On React and Angular
- About an Application - We have developed a web application dedicated to supporting orphanages. This platform allows orphanages to request assistance for their various needs. Donors can contribute as much as they are able, helping to fulfill these requirements. The application features a Fund Manager user role to ensure the efficient management and distribution of donations, ensuring that orphanages receive the necessary support in a timely manner
- Roles and responsibilities - My role is like i have to retrive the data from the server-side into the client-side like fetchData , also CRUD(Crete,Read,Update,Delete) and In this application every user wants to gets approved from the admin , so that's the major funtionality and aslo handling the routing components , like this i have been a part of other applications.

Manual Testing and Automation Testing
- At First they thought about the applications major funtionality end-to-end. After that we have to test the application as the funtionality and report the bugs.
- On the other hand, we used a tool called Protractor for scripting, which allowed us to achieve the desired end result.
