Redux   Bootstrap

PERSONAL PROJECTS

Social App | React,Redux,Material UI, MongoDB, Node.js, Express.js (01/2024 - 03/2020)

- Created a visually appealing and user-friendly interface with Material UI for easy navigation and interaction.
- Stored user data securely using MongoDB, ensuring efficient management of profiles, posts, and comments.
- Managed app state effectively with Redux, maintaining consistent data flow and performance.
- Enabled users to find friends easily by searching their names and to add or remove them as desired.
- Provided secure registration, login, and logout functionality using JWT authorization, with the added flexibility for users to personalize their experience with dark or light mode themes.

Food Delivery App | HTML,CSS,Javascript (03/2024 - 06/2024)

- The navigation part allows you to switch between sections like the menu, food, services, about us, and footer sections, making it easy to explore the site.
- The menu section lists all the dishes we offer, while the food section showcases pictures and details of our popular and special items.
- The services section explains what we provide, such as catering, delivery, and dine-in options.
- The about us section tells our story and introduces our team, while the footer section has important information like contact details and social media links.
