Objective

Am A Front-End Developer with 2+ years of experience in building responsive and user-friendly web applications using Angular, HTML, CSS, and JavaScript, focused on performance and accessibility.

Skills

- Frontend Technologies: Angular, HTML,CSS
- Programming Language: Javascript (ES6+), Typescript,OOPS
- Backend: Express.js,Node(basics) Database:MongoDB/Mongoose(basics)

Experience

- **Trangile Services Private Limited**   05/22 - Present
  Software Engineer

Projects

- **PPG-LMS**

  -Developed and implemented 40+ dynamic UI components in Angular, enhancing user experience and responsiveness by 25%. Optimized front-end performance, achieving a 30% improvement in data processing speed and reducing load times by 15% through streamlined API interactions.

  -Designed and developed the front-end interface for an email scheduling system using Angular, enabling automated report generation for Plaza Premium Lounge's finance team and improving productivity by 80%

  -Led a series of one-on-one code review sessions with team developers, improving code quality metrics by 35% and
  ensuring adherence to best practices across the team; established a culture of continuous improvement.

  -Integrated third-party SOAP APIs from five key partners into the lounge management system, enhancing interoperability
  and expanding functionality to meet partner requirements; improved system response time by 40% during peak hours.

  - Streamlined manual reporting repetitive processes by creating automation scripts that eliminated manual data entry,
  reducing average task completion times from two hours to just 20 minutes for each function.

  -implement one-to-one localization for every screen, ensuring seamless adaptation to multiple languages and enhancing the user experience for diverse audiences.

  -Assisted in resolving minor bugs across the project, ensuring smooth functionality and enhancing overall application stability.
