## PROJECTS:
**STUDENT DETAILS INFORMATION:(MINI PROJECT)**
**HTML, CSS, Core JAVA**
The Student Management System is a Core Java-based application for managing student records, which allows users to add, display, update, and search for student information. The program uses an object-oriented approach and incorporates various classes such as Student, Subject, and Class. The Student Management System is designed to be user-friendly, with a simple command-line interface that enables users to quickly access and manage their data. Also Use HTML CSS for FrontEnd
